THE GAME

Mazer Blazer combines the best of both worlds—the old-fashioned fun of a shooting gallery and state-of-the-art video technology Cosmic attackers from outer space attempt to storm center base To succeed they have to avoid constant fire from the ultimate weapon—a two-handled electronic laser with gun sight and dual destroy buttons

The invaders attack in waves Next a bonus rack with a free-shooting field Players can advance through a total of 12 racks Each rack presents a new exciting challenge Starting with the 6th rack there is not just one, but two center bases That means more ways for the cosmic attackers to get in and fewer ways to keep them out
